MANOJ R

Aspiring Junior Cloud Engineer | AWS Certified Cloud Practitioner

Chennai, India | 7305444124 | manojrajabadhar2953@gmail.com | LinkedIn: linkedin.com/in/manojr

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and Electronics & Communication Engineering graduate with a genuine passion for cloud computing and IT infrastructure. Possesses a basic working understanding of AWS core services, Linux, networking fundamentals, and system administration, along with strong analytical and troubleshooting instincts. A quick learner who adapts well to new tools and technologies, with good communication and teamwork skills. Seeking an entry-level opportunity as a Cloud Support Engineer, Cloud Administrator, or Junior Cloud Engineer to build a long-term career in cloud operations.

TECHNICAL SKILLS

Cloud Platform: AWS (Beginner), Cloud Computing Fundamentals, Shared Responsibility Model, AWS Global Infrastructure

AWS Services: EC2, S3, IAM, VPC (Basic), Route 53 (Basic), EBS, CloudWatch (Basic), Elastic Load Balancer (Basic), Auto Scaling (Basic)

Operating Systems: Linux Basics (Ubuntu/Amazon Linux), Windows Basics, File Management, User & Group Management, Basic Bash Commands

Networking: OSI Model, TCP/IP, IP Addressing, Subnetting Basics, DNS, DHCP, HTTP/HTTPS, SSH, VPN Basics

Cloud Administration: IAM User & Role Management, Security Groups, Resource Provisioning, Basic Monitoring, Log Analysis, Backup Fundamentals

Scripting: Basic Bash, Basic Python

Version Control: Git Basics, GitHub Basics

Soft Skills: Analytical Thinking, Troubleshooting, Communication, Teamwork, Eagerness to Learn

ACADEMIC / PERSONAL PROJECTS

Static Website Hosting using Amazon S3

Objective: Host a static website on AWS to understand cloud-based content delivery

AWS Services Used: Amazon S3, IAM

- Created and configured an S3 bucket for static website hosting with appropriate bucket policies
- Uploaded HTML/CSS files and set permissions using IAM to control access
- Tested website accessibility and troubleshot basic permission and configuration errors

Key Learning Outcomes: Gained hands-on understanding of S3 bucket configuration, static hosting, and basic IAM permissions

Secure Linux EC2 Instance Deployment with IAM and Security Groups

Objective: Launch and secure a Linux EC2 instance following basic cloud security practices

AWS Services Used: EC2, IAM, VPC, Security Groups

- Launched an Amazon Linux EC2 instance and connected to it securely using SSH
- Configured security groups to restrict inbound/outbound traffic to required ports only
- Created a limited-privilege IAM user and role to manage the instance following least-privilege principles

Key Learning Outcomes: Learned EC2 deployment, basic Linux administration, SSH access, and fundamentals of securing cloud resources

AWS Cloud Monitoring using Amazon CloudWatch

Objective: Set up basic monitoring and alerting for an EC2 instance

AWS Services Used: CloudWatch, EC2, IAM

- Configured CloudWatch to monitor basic EC2 metrics such as CPU utilization
- Set up a simple CloudWatch alarm to trigger notifications on defined thresholds
- Reviewed CloudWatch logs to understand basic log analysis for troubleshooting

Key Learning Outcomes: Gained foundational experience in cloud monitoring, alerting, and basic log analysis for IT operations

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

JNN Institute of Engineering, Chennai | May 2025

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services, April 2024
- Python Programming Course – Besant Technologies, September 2025

ACHIEVEMENTS

- Completed hands-on AWS Cloud Practitioner training covering EC2, S3, IAM, VPC, and CloudWatch
- Applied embedded systems and IoT experience (Arduino, Raspberry Pi) from internship to build a foundational understanding of hardware-to-cloud data flow
- Consistently pursued self-learning through offline courses in AWS and Python alongside academics
